

Quality Improvement Plan 2023-24

Apotex, Jewish Home for the Aged: Long-Term Care

Each year, we develop a Quality Improvement Plan to identify the key improvement priorities and steps we are committed to take to ensure our residents receive exceptionally high quality of care and quality of life.

IMPROVE RESIDENT
SOCIAL LIFE

Apotex residents and families tell us that we can be doing more to deliver meaningful activities within the home.

Our goal is to always ensure that the programs we co-design with residents and deliver matter to residents and are meeting their needs each and every day.

APPROPRIATE
PRESCRIBING

Antipsychotic medications, often used to manage symptoms of psychosis, are also commonly and appropriately prescribed for seniors living in long-term care to manage severe behavioural and psychological symptoms of dementia.

Our goal is to ensure that antipsychotic medications are being used for the right symptoms, at the right dose and only for as long as needed.
