

The tool uses the acronym **CARER** to help remind caregivers of the 5 steps.
Please see below:

Calm down (self-talk)

Slow down, take deep breaths, use some positive self-talk.

Attend to the interaction without immediately reacting

Remind yourself that this person is unwell, distressed, and can't explain why.

Reflect on your own feelings

1. What am I feeling? (e.g., angry, frustrated, worried, sad)
2. Why do I feel this way?

Empathize with the other person's feelings

1. What is the other person feeling?
2. Why is the other person feeling this way?

Respond

Now I can respond.
